TABLEWARE WITH SUPPORTING FEATURES.

SMART DESIGN BRINGS EVERYONE TO THE TABLE

Eating together is an important social event and one of life's simple daily pleasures – provided everyone can participate and enjoy their food. The award-winning family tableware by ORNAMIN has been designed with style as well as function, removing any stigma or embarrassment about using adaptive crockery because its supportive features are hidden in its design. Additionally, the smart ideas are combined with great materials which make the tableware e.g. extremely light and very sturdy.

These smart ideas make life simpler and encourage independence:

OUR FEATURES: THE GLORIOUS 6

SLOPED BASE

Design with a whole new slant. The colourful, attractive plate boasts a cleverly concealed sloped base and discreet protruding lip, both of which make it easier for people eating with one hand to access food with a fork or spoon.

INTERNAL CONE

Raise your cup, not your head. The cone-shaped interior allows you to drink from the mug without tilting your head back, so that people who have physical limitations or are bed-bound can drink with ease.

RAISED EDGES

Spreading made easy. A slightly raised surface can make all the difference – for instance, when you can only use one hand. That's why our Non-slip Boards have raised edges on three sides that will prevent a slice of bread from sliding off.

THERMAL FUNCTION

Keep Warm Plate and Bowl

Hot stays hot and cold stays cold. The hollow space between the inner plate and the outer plate can be filled with hot water, cold water or crushed ice. This way the food stays warm (or cold) for longer giving slow eaters more time to enjoy their meal.

Keep Warm Mugs

The mugs also have a double-sided wall, but instead of water the insulator is air. The air insulation helps maintaining the desired temperature of fluids for longer making it more enjoyable to drink.

NON-SLIP FUNCTION

Well in hand. Just try to keep your hands off these products. Decorative features, grip pads and a mug sleeve made from a special non-slip material ensure a firm grip even when the mug is moist or when hands shake or lack sensation.

BRAKE FUNCTION

This is a non-slip zone. Sometimes it's the areas you're least likely to notice that conceal something special. In the case of our plates and bowls, it's under the base, where a clever non-slip ring ensures that nothing slides around when you're eating.

BRAKE FUNCTION
Firm hold.

PLATE WITH SLOPED BASE
Ø 26 cm
Model 901

Alongside a fantastic design, the plates and bowl have a sloped base and a discreet protruding lip. Both make it easier for people with limited hand mobility to access food with a fork or spoon.

The interior base is not flat, but rather slopes towards the edge of the plate. Together with a discreet protruding lip, the food slides towards the fork or spoon as if by magic whether tomato soup on the plate or vanilla pudding in the bowl. A non-slip ring also guarantees a firm stand.

NON-SLIP BOARDS

Spreading made easy. A slightly raised surface can make all the difference – for instance, when you can only use one hand. That's why our Non-slip Boards have raised edges on three sides that will prevent a slice of bread from sliding off. And the non-slip ring under the base ensures that nothing slides around when you are preparing your sandwich.

These hidden features make the Non-slip Board the best assistant for people with limited hand mobility because it encourages independence.

FOOD PREPARATION HELP

The Food Preparation Help is the perfect addition to the ORNAMIN Non-slip Boards.

Attached to the raised edges of the boards, it allows for simple bun spreading and safe slicing of cheese, vegetables and fruits. It is easy to assemble and remove with one hand. It sits firmly on the raised edges of the Non-slip Boards, thus guaranteeing it can't slip during cutting or spreading.

THERMO MUG

THERMO MUG 260 ml
Model 206

Warm things should stay warm and cold things should stay cold. The double-sided wall keeps the drink warm or cold as required. And its ergonomically designed extra large handle ensures a safe handling of the mug.

The Thermo Mug is also available as a 'firefly': after standing next to a source of light for a few minutes the mug starts to glow – ideal for an easy access to the mug in dark rooms.

Also available with cone-shaped interior (see page 10).

CHILDREN'S TABLEWARE

For little heroes with big appetites: The child-friendly crockery 'For little heroes' by ORNAMIN makes every mealtime big fun for all kids. It is made of practically unbreakable melamine that can withstand almost anything. The bowl and plates come with two colourful non-slip grip pads each, while a colourful non-slip sleeve is provided for the cup. This ensures that every piece is easy to pick up, even for the smallest, clumsiest hands. Additionally a non-slip ring under the base guarantees a firm stand.

All in all, the children's tableware 'For little heroes' by ORNAMIN encourages children to eat and drink independently as its size, weight and features are adjusted to the motor skills and power of children.

TWO HANDLED MUG WITH INTERNAL CONE
140 ml
Model 815

Function on the outside, geometry on the inside. In addition to the effective thermal function, the mugs hide a cone-shaped interior. This means that even people who are bed-bound or have limited movement in the neck and arms can satisfy their thirst. And in contrast to the nose cut-out cups that are often used for people with physical limitations, the Mugs with Internal Cone are also intuitive to use and require no explanation.

It's all made possible thanks to the cone-shaped interior, which tapers towards the bottom and looks like an ice cream cone. This clever feature enables people to drink by themselves without having to tilt the head backwards. The nose no longer gets in the way, either. And since its function is concealed within the mug's interior, it looks no different to our conventional thermo mugs. The users therefore never feel embarrassed, discriminated against or alienated, but rather part of the group – just like they should.

The Mug with Internal Cone is available in three designs:

- **Model 905:** classic shaped handle
- **Model 207:** ergonomic XXL-handle
- **Model 815:** two ergonomic XXL-handles

PRODUCT OF THE YEAR 2011

NON-SLIP CUP WITH FLOWER NON-SLIP CUP WITH SCALE

The design is made of a special material with a powerful non-slip effect. It not only looks great, but also noticeably improves comfort while drinking. The strong grip makes drinking a relaxed pleasure, even for people with restricted hand mobility.

The Non-Slip Cup Flower combines a fresh design with an intelligent function. Even in clammy or shaky hands, this cup promises not to slip through your fingers. The transparent Non-Slip Cup Scale not only offers a pleasant grip and a firm hold, but also allows the contents to be checked quickly and easily.

Model 420

MUGS WITH HANDLE

The Mug 508 and Mug 510 have extra large handles which offer a secure hold and therefore support safe drinking. Also, the mugs ensure practical and space-saving storage.

The Mug 420 is characterised by its modern and colourful design. Its handle also offers a secure hold and supports safe drinking. The mug is light weight, sturdy, dishwasher safe and microwaveable just like the Mugs 508 und 510.

SPOUTED LIDS

The Mugs 508, 510 and 420 are combinable with the Spouted Lids 511 and 512. The Spouted Lid 511 with a small hole is suitable for drinks and the Spouted Lid 512 with a big hole is suitable for thickened fluids or mash.

CUP WITH DRINK TRACKING

Nutrition and hydration are important concerns in care settings – whether in residential homes, hospitals or at home. Improving hydration can bring well-being and better quality of life for patients, allow reduced use of medication and prevent illness.

To help older people reduce their risk of dehydration it is important to recognise when the person is not drinking enough. Therefore ORNAMIN invented a cup that monitors the fluid consumption and transmits the data electronically via wifi. This makes it easier to keep track for care professionals as well as caregiving relatives. To make sure the data is accurate the cup can differentiate if fluids have been drunk or spilled.

Besides monitoring how much has been drunk the cup also gives acoustic and optic signals to remind the person to drink. The acoustic signal can also be used for localising the cup.

The Cup with Drink Tracking will be available in spring of 2019. In the final phase of development more functions might be added. Customized programming is also possible.

If you have any questions or feedback please feel free to contact us (contact info on the back of this brochure). We always appreciate any input to improve our products.

CUTLERY SET

With its ergonomically shaped, slip-on grip pads the Cutlery Set guarantees a firm hold. Thanks to the non-slip material TPE the cutlery stays put, even in clammy, numb or shaky hands.

The S-shaped silhouette of the fork and spoon offers discreet support when lifting, holding and guiding the cutlery. The round grip of the knife allows it to sit comfortably in hands of all sizes, and can be placed between the middle and index fingers, for instance – for a confident grip when holding and cutting.

RAISED EDGES
Simplified spooning.

SPOON GUARD

The Spoon Guard is the perfect and discreet addition to ordinary dining spoons. It ensures the food stays put even with shaky hands which makes it ideal for people living with Parkinson's Disease. Its flexible material is tasteless (certified for food). It is easy to use and suited for multiple uses.

For more information go to: www.tremor-spoon.co.uk

EATING AND DRINKING WITH DEMENTIA.

THE RED RANGE

Eating and drinking habits often change in those affected by dementia: they have less hunger and thirst and no longer understand the need to eat or drink. The functional tableware by ORNAMIN is based on one main principle: eating is a visual process too. Clear shapes and contrasting colours help to make eating and drinking simpler and easier to do. **Our tip:** Red is the colour of dementia because it has a positive effect on the appetite, provides orientation and is a colour that those suffering from dementia can still recognise even in the advanced stages and it makes contrasts in colour easy to see.

The plates, bowls, cups and boards are also characterised by their intuitive handling. The supportive features hidden in the design make everyday challenges easier to overcome. This promotes independence and a feeling of self-esteem. And: **something that is practised everyday is harder to forget.**

Clear shapes and contrasting colours give orientation.

For more information about the subject of eating and drinking with disabilities go to www.ornamin.co.uk/care or ask for our leaflets:

TABLEWARE FOR CATERING AND HOSPITALITY.

MORE THAN 60 YEARS OF EXPERIENCE

Whether it's adults or children, any time several people gather around a table, the constant noise can sometimes be quite irritating. ORNAMIN tableware is **pleasantly quiet**, which is good news to both the dining guests and the kitchen staff. It is also **especially light**, which is primarily noticeable when you are carrying a tray of several plates and bowls to your table. Two benefits, in particular, that are easy on the wallet are the **extreme sturdiness** and the **energy-saving** material.

The average breakage rate of melamine tableware is just **2 %** (in comparison the average breakage rate of porcelain is **33 %**). Fewer breaks means **long durability** and **less need for replacements**, whilst the low thermal capacity ensures that food stays warm for longer without preheating and less energy is required for cleaning. What's more, the weight tolerances of melamine tableware are much lower than those of porcelain, so that the **tare weight is always right** with ORNAMIN. And, finally, there is the issue of eco-friendliness. Due to the materials used, the tableware is fully recyclable. And ORNAMIN offers a **warranty** on manufacturing defects, provided the care instructions have been followed (normal signs of tear and wear excluded).

By the way: Tableware made of melamine is perfectly suitable for decorations. You can either choose from the wide range of designs offered by ORNAMIN or create a **customised design**.

*Ornamin offers a 30-year warranty against manufacturing defects. Only if the directions for use and care instructions are followed. This warranty does not cover normal wear and tear.

**On request the Ornamin tableware can be equipped with RFID technology.

SAVING POWER MEANS SAVING COSTS AND THE ENVIRONMENT

Less power consumption in the dishwasher.

Dishes do not have to be preheated.

LESS WEIGHT AND LESS NOISE PRODUCTION
Relief for kitchen staff and guests.

STURDY AND DURABLE
Less shards mean less need for replacements.

OUR TARE IS CORRECT
Low weight tolerances.

CLASSIC STYLE TABLEWARE

The Classic Style Tableware series by ORNAMIN offers a stylish solution for canteens, cafeterias, schools, daycare centres, nursing homes and hospitals. The plates are characterized by a narrow rim which clearly separates the large inner surface of the plates. Both the rim and the inner surface of the plates are suited for decorations which can be chosen from the wide range offered by ORNAMIN or individually designed.

ELEGANT STYLE TABLEWARE

Modern design meets sustainable material: The broad rim of the plate in combination with the smooth transition to the inner surface provides for an elegant appearance. The noble white of the tableware underlines this impression. The rim of the plates is suited for decorations which can be chosen from the wide range offered by ORNAMIN or individually designed. All in all this tableware series combines aesthetic, economic and environmental aspects in a classy way.

ORNAMIN offers a wide range of plates, bowls and cups. For a complete overview feel free to contact us.
