

THE FEATURES

Simply clever

SLOPED BASE

When only one hand is available, the sloping inner base and inconspicuous overhang help food get onto the fork or spoon more easily.

THE STOP FUNCTION

Even with one hand, the three raised edges of the chopping board ensure that nothing slips when spreading bread.

INTERNAL-CONE FUNCTION

The cone shaped inner cup makes it easy to empty the cup without having to tilt your head back.

THE STOP FUNCTION

In case of shaking, tremor or hand cramps, the inconspicuous spoon guard ensures that the food stays on the spoon.

THE DOSE FUNCTION

In case of swallowing disorders, the inconspicuous drinking lid helps by reducing the flow of fluid. Choking is prevented and the natural swallowing process is preserved.

THE THERMAL FUNCTION

Those who need longer can still enjoy their food warm.

THE BRAKE FUNCTION

When greasing or spooning with only one hand, the non-slip ring on the bottom helps to ensure that nothing slips on the table.

THE NON-SLIP FUNCTION

In case of numbness, shaky hands or moisture, the grip cushions made of anti-slip material guarantee safe holding.

THE SYMPTOMS

Activation and independence

eating with one hand

shaky hands (tremor)

motor impairments of the arms, hands and fingers

visual impairment

cervical spine restriction

difficulty swallowing / dysphagia

numbness, clammy hands, lack of fine motor skills

slow eating and drinking
